

## Rent a Cloud Engineer

### Targeted expertise for your cloud project

Lack of experience and expertise can significantly slow down cloud initiatives, especially if there is a shortage of experienced AWS architects. With our “Rent a Cloud Engineer” approach, we help you overcome this bottleneck and move your cloud projects forward. Based on your needs and requirements, we will provide you with an AWS Architect with the appropriate skill level to answer technical questions about AWS and support your team with targeted expertise. This ensures that your cloud initiatives proceed smoothly, without the risk of rash decisions.

#### Your benefits

Your internal organization can work with us to define and fill the necessary roles. Your experts will get direct access to skilled AWS contacts. In addition, your security and governance managers will benefit from best practices and qualified architecture assessments. Your AWS projects are quickly assigned a single point of contact for seamless integration, thus accelerating project implementation and improving the quality of your cloud initiatives.

#### Our services

In an initial consultation, we will determine the level of AWS expertise that is required for your current situation. We customize our offerings to fit your projects and requirements. Depending on your needs and specialist area, you can choose between German- and English-speaking AWS experts. This enables flexible and efficient collaboration, especially in international teams. Interpersonal chemistry is of particular importance to us. We believe that success depends not only on technical expertise, but also on working together as equals.

#### Why Skaylink?

We are the benchmark for security in the cloud:

- Broad AWS expertise: We offer a wide range of AWS skills – from experienced Principal Cloud Consultants to young, technical experts at the Associate level.
- Support from experienced Senior Architects: For complex issues, experienced Senior Architects are available in the background to find optimal solutions.
- Skaylink is the first AWS Security Competency Partner in the DACH region – Germany (D), Austria (A), Switzerland (CH) – and has over 20 years of digitalization expertise.

Do you have questions for an AWS expert?
