

AWS VMware migration

Future-proof your business by migrating VMware to AWS

In light of the recent acquisition of VMware by Broadcom, businesses face increased uncertainty around service continuity and rising licensing costs. Skaylink offers a seamless, efficient migration solution from on-premises VMware environments to AWS, helping businesses future-proof their operations with improved scalability, flexibility, and cost-efficiency.

Why migrate with Skaylink?

Seamless transition: Skaylink provides a risk-free migration to AWS, eliminating the unpredictability of VMware's changing licensing landscape.

Cost efficiency: AWS funding can cover migration costs entirely, minimizing investment stress. After migration, Skaylink ensures continuous cost optimization.

Future-proof operations: Gain the benefits of AWS, including global scalability, enhanced resilience, and improved security, while modernizing from virtualization to containerization and serverless technology.

Comprehensive support: Skaylink's team of experienced professionals ensures a smooth migration with minimal disruption. We provide ongoing operational and modernization support to maximize business continuity.

Post-migration managed services: After migration, Skaylink's professional managed services team can operate and maintain your AWS infrastructure, providing continuous monitoring, optimization, and expert support to ensure your cloud environment runs smoothly.

Key benefits

Increased flexibility: Take advantage of dynamic scaling, better availability, and security with AWS.

Sustainability: Align your IT infrastructure with environmentally sustainable practices.

Agile and best-practice approach: Skaylink's modern and agile methodology ensures the solution is perfectly aligned with your business needs, backed by direct collaboration with AWS and customer feedback.

Scalable infrastructure: Achieve the scalability needed to grow your business globally while reducing costs.

Zero cost migration

With funding from AWS, you won't incur any migration costs.

Target audience

This solution is tailored to the needs of small and mid-sized businesses (SMBs) that currently use VMware on-premises and are looking to renew or extend licenses while leveraging cloud technologies to improve IT infrastructure, reduce costs, and increase performance.
