

# Cloud Competence Center (CCC)

A solid framework for your cloud journey

For over two dozen years, Skaylink has been supporting German small and medium-sized companies and large groups with outstanding digitalization projects. There is one thing that all of these successful projects have in common: they require experience, expertise, and best practices.

To ensure the successful, secure, and sustainable use of the cloud, it is essential to define and establish clear responsibilities within the organization. The term Cloud Competence Center (CCC) has become established as a centralized unit responsible for a company's cloud journey. With a CCC project, our customers can significantly simplify and accelerate their journey to the cloud. We combine our own methodologies with those of AWS and Microsoft, drawing on our extensive experience from hundreds of projects. This enables us to support your unique cloud journey quickly and efficiently.

## Skaylink & CCC

- Leverage our experience in the financial and banking sectors, the upper middle market, with software vendors serving regulated customers, and numerous other industries.
- Bundled expertise and proven methodologies from countless AWS, Microsoft, and dedicated digitalization projects
- In-house expertise, including project and program management, security and governance, and operational structures

## Your added value

- Deep expertise and targeted support for all your questions and concerns
- Multiple references and best practices
- Quick status quo analysis and derivation of a recommended course of action
- Analysis of your current CCC structure using a variety of methods provided by Skaylink, AWS, and Microsoft
- Roadmap for your cloud journey involving all key stakeholders to maximize business value
- Our highest partner status with AWS and Microsoft provides comprehensive funding for your cloud journey, along with a wide range of support services from the top cloud providers.

## Why Skaylink?

- A cloud champion with a broad spectrum of expertise spread across more than 550 experts – 25 years of digitalization expertise
- A dedicated cloud advisor and single point of contact for you – no complex project structure
- Skaylink as a German medium-sized company – on an equal footing with our customers
- Cloud-agnostic approach – We focus on the cloud journey, not the cloud provider.

**Do you have questions for an AWS expert?**
